

NTS

The experts for **Air conveyors**

consulting
engineering
installation
after-sales services
maintenance

Our projects are **yours...**

...Your requirements are **ours**

a comprehensive offer & recognized expertise

EXPERTS IN THE DESIGN OF CONVEYOR LINES AND BOTTLE CONVEYORS

The NTS Group has a presence on every continent, and counts amongst its clientele almost every single international operator in the drinks market.

NTS continually advances its activities in the design and implementation of bottling lines, with specialised solutions proposed for the transfer of all other packaging types as well.

The overall offering, from design through to deployment, includes the provisioning of all machinery integral to the “package conveyance” line.

NTS air conveyors are used in over 50 countries around the world. They respond perfectly to the demands of our clients because they can be adapted to any type of packaging and production flow.

our expertise at your service

OUR KEY ADVANTAGES

NTS air conveyors enable:

- ▶ **on-line productivity improvements** by absorbing brief line stoppages and protecting upstream and downstream machines;
- ▶ **high speed conveyance** of empty, light or unstable bottles;
- ▶ **sequencing together various machines** with total flexibility.

The NTS product range provides solutions for all types of packaging that can benefit from the use of conveying systems using:

- ▶ **Air flows** :
 - for PET-PEHD bottles for mineral water and soft drinks;
- ▶ **Air cushions** :
 - steel & aluminium drink containers,
 - single use pack & packaging.

YOUR PROJECTS

Consulting

Our engineering services can define a successful overhead conveyor system customised to your needs by evaluating:

- ▶ the production flows of your workshop or plant,
- ▶ the setting up of your new machines (blowers, fillers, correctors...),
- ▶ your essential particularities: the types of product to convey, speeds, and hygiene requirements.

Engineering

Our technical teams provide full spectrum mechanical, electrical and pneumatic studies services.

Installation

Deployment of the solution on site with the help of our fitters and cabling, depending on your short-term requirements for specific assistance.

Commissioning

To make sure that your facility achieves the optimal speeds as defined by your system specifications, our experts will regulate:

- ▶ all of the aeraulic parameters,
- ▶ the positioning of the under-neck, lateral and other product guides.

YOUR DAILY OPERATIONS

Maintenance of your lines

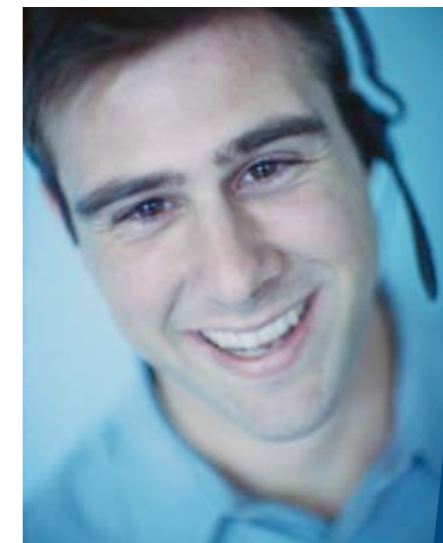

More than just products, NTS offers a comprehensive range of services to its clients. NTS places great importance on the regular daily needs of its clients and provides dedicated teams for:

- ▶ After Sales Service,
- ▶ maintenance of your facilities,
- ▶ spare parts services.

Optimising your productivity

With its solid experience in air conveyor systems, NTS offers to audit your installations - regardless of the original manufacturer - with the aim of optimising their performance and minimising any blocking points.

- ▶ Comprehensive performance diagnosis for the installation;
- ▶ In-depth analysis of the aeraulic parameters;
- ▶ Publication of a detailed report and proposals for corrective solutions.

DES SOLUTIONS PERSONNALISÉES

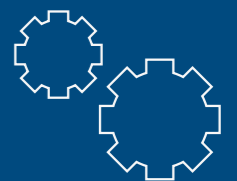

The NTS turnkey offer, from design right through to commissioning of the line by our technicians, allows us to provide solutions to any and all of your projects.

Because we experienced your business, we can provide solutions designed to improve the longevity and performance of your facilities that meet your strict product requirements, and yet still manage to control your costs.

PATENTED SOLUTIONS

With over 20 years of experience in the business of air conveyor systems, NTS has developed numerous innovative and efficient solutions specifically conceived to limit the blocking points in a facility (hollow spacers in an air duct, automatic multifurcating, ...).

COMPLEMENTARY SOLUTIONS

Since 2007, NTS has been a subsidiary of CIMLEC Industrie, a specialist in the automation of production lines and robotised process integration. This means we can also provide you a full-spectrum offer for all of your end-of-line production operations: palletisation, bulk goods handling...
